Polyethylene FT6236

Low Density Polyethylene

Description

FT6236 is a low density polyethylene based on the tubular technology for film extrusion, containing anti-block and slip additives.

CAS-No. 9002-88-4

Applications

FT6236 is intended for:

Pouches
Food packaging
Shrink film

Automated packaging
Blown film

Additives

	Content	
Antiblock (Synthetic Silica)	800 ppm	Borealis Method
Slip (Erucamide)	550 ppm	Borealis Method
Antioxidant	Yes	Borealis Method

Special Features

FT6236 is optimised to deliver:

Very good optical properties

Physical Properties

Property	Typical Value	Test Method
Data should not be used for specification work		
Density (Base Resin) (23 °C)	923 kg/m ³	ISO 1183
Melt Flow Rate (190 °C/2,16 kg)	2 g/10min	ISO 1133

Storage

FT6236 should be stored in dry conditions at temperatures below 50°C and protected from UV-light. Improper storage can initiate degradation, which results in odour generation and colour changes and can have negative effects on the physical properties of this product.

Safety

The product is not classified as dangerous.

Please see our "Safety data sheet" / "Product safety information sheet" for details on various aspects of safety of the product. For more information, contact your Chemicals Plus representative.

Recycling

The product is suitable for recycling using modern methods of shredding and cleaning. In-house production waste should be kept clean to facilitate direct recycling.
